

RUDRAKSH MITTAL

Final Year B.Tech CSE (AI & ML) — Data Engineering & Applied AI

Bengaluru, Karnataka | +91 8285692725 | rudrakshmittal19@gmail.com | [linkedin.com/in/rudraksh-mittal19](https://www.linkedin.com/in/rudraksh-mittal19) | github.com/rudrakshmittal19-star

PROFESSIONAL SUMMARY

Final-year Computer Science (AI & ML) student with hands-on experience across three AI-focused internships and multiple applied-AI projects spanning workflow automation, healthcare chatbots, NLP, and data engineering. Skilled in Python, SQL, and modern ML/LLM frameworks, with a track record of shipping full-stack systems end to end — from data pipelines through deployed applications. Seeking a software engineering, data engineering, or applied AI role to build practical, data-driven solutions.

CORE SKILLS

Programming Languages: Python, Java, C, SQL
AI / ML: NLP, Text Similarity Analysis, Prompt Engineering, LLM Applications, Predictive Modelling
Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Hugging Face, Gemini API
Data Engineering: Data Pipelines, Automated Data Extraction, Document Processing, ETL
Data Processing: Data Cleaning, Data Preprocessing, Feature Engineering
Tools & Platforms: Git, GitHub, Jupyter Notebook, Vercel, Supabase
Databases: MySQL, MongoDB
Soft Skills: Leadership, Communication, Problem Solving, Team Collaboration, Time Management

EXPERIENCE

- AI Intern, HCLTech, Noida** Apr 2026 – Jun 2026
- Built AI-powered incident management workflows for ServiceNow IncidentAI, using prompt engineering and structured incident datasets to automate issue reporting for enterprise IT service management.
 - Designed incident data models and reusable prompt templates that improved information retrieval speed and reporting accuracy for enterprise support teams.
- AI Intern, EONMED, Noida (Remote)** Apr 2026 – May 2026
- Developed MediAssist, an AI-powered healthcare chatbot supporting symptom-based assistance, medical report uploads, and conversational interactions using Gemini-powered workflows.
 - Integrated a Supabase backend and deployed the application on Vercel, enabling secure authentication and real-time medical report management.
- Engineering Intern, Droom Technology Pvt. Ltd., Gurugram** Apr 2025 – May 2025
- Built a Python ETL pipeline using pdfplumber, Camelot, and PyMuPDF to convert 1,000+ unstructured vehicle inspection PDFs into structured, ML-ready datasets.
 - Published the resulting datasets on Hugging Face to support downstream analytics and machine learning workflows for the engineering team.

PROJECTS

- Knowledge Nexus — Student Management ERP | Next.js, Supabase, Groq AI, Tailwind CSS**
- Built a full-stack ERP for a coaching institute managing student records, attendance, fee collection, expenses, faculty operations, and batch scheduling on one centralized platform.
 - Implemented role-based access control, analytics dashboards, and automated reporting, plus a Groq-powered LLM assistant over live data, to streamline academic and administrative workflows.
- Settlement Reconciliation Agent | Next.js, Supabase, Groq API, TypeScript**
- Built an AI-augmented reconciliation engine for the Razorpay AI Buildathon that matches settlement records against merchant ledgers, using deterministic rules for most cases and escalating only ambiguous pairs to an LLM reasoning layer.
 - Designed a full audit trail with per-match confidence scores and plain-English reasoning, plus human-override support, keeping every automated decision explainable and reviewable.
- AI Resume-Job Matcher | Python, NLP**
- Built an NLP-based resume screening system using text preprocessing, keyword extraction, and similarity scoring to match candidate resumes against job descriptions.
 - Implemented automated candidate ranking and compatibility analysis to improve recruitment efficiency and streamline shortlisting.
- Sustainable Guest Management System — Jungle Lodges & Resorts (Govt. of Karnataka) | Python**
- Built a sustainability monitoring system tracking guest water and energy consumption against predefined benchmarks, assigning Gold/Silver/Bronze performance tiers.
 - Automated eco-certificate generation and delivery via email and WhatsApp integration.

CERTIFICATIONS

- MongoDB Basics — MongoDB University (Jul 2025)
- IBM Cognos Analytics — IBM Cognitive Class (Jul 2025)
- Operating Systems Foundations — Scaler Academy (Jun 2025)
- Build Your Own Chatbot (Level 1) — IBM (Oct 2024)
- Introduction to Data Science — Cisco Networking Academy (Sep 2024)
- Advanced Excel for Data Analysis — Microsoft (Jul 2023)

LEADERSHIP & ACTIVITIES

- Overall Coordinator & Sports Media Head — Devadan Cup 2025, Christ University.
- Volunteer → Program Coordinator (POC), Centre for Social Action (CSA) — started as a volunteer supporting health awareness campaigns and blood donation drives, then progressed to leading outreach initiatives with schools, NGOs, and special education institutions.
- Former School Sports Captain — led teams in inter-school competitions and district-level cricket tournaments.
- Participant, SAP Labs Vibethon Hackathon — built an AI-powered smart event management platform.
- Participant, NASA International Space Apps Challenge, Christ University (Kengeri Campus) — Team: ExoSky (Aug 2025).
- Participant, Amazon Innovation Challenge.

EDUCATION

Christ University, Bangalore 2023 – 2027
B.Tech Computer Science Engineering (AI & ML) | GPA: 3.5 / 4.0

Presidium School, Indirapuram
Class XII: 76% (2023) | Class X: 93% (2021)
